

What made this quiz app fun/not fun to play?

It was cool to learn about different NZ birds

Was everything straight forward?

Yes it was a smooth and easy platform to use.

What parts of the app were well designed?

The visuals are pleasing, the transition between questions was smooth

What made these designs good?

I like the use of the green and the ferns in the background, it makes sense thematically for the app and looks really pretty. The transitions between each question wasn't glitchy or clunky which was helpful for completing the quiz.

What was good/bad about the per answer result feedback?

Good to find out as you go what the answers are.

What about the gesture navigation (swiping to go between the menu and infographic) is good or can be improved?

No comment

Do you prefer navigating with the buttons, gestures, or both?

Probably the buttons

Were the pictures themselves clear and identifiable?

Mostly, in a few of the photographs the birds were hard to see immediately, but this kind of added to the fun of figuring out the answers.

How did you find the quiz length?

Could be longer!

How confident between 0 – 10 (not confident, very confident respectively) are you with identifying New Zealand's native birds?

6

Was the content presented within the quiz unknown and/or informative?

There was a mixture of birds I knew and didn't. It was informative in both the quiz itself and the encyclopedia section. I think a few of the encyclopedia entries could benefit from some more detail, especially in regards to the Australasian bittern and potentially other birds with indigenous cultural importance.

Did/would you find this application advantageous to expand your knowledge about New Zealand birds?

Yes!
